Whoami?

An entry-level cybersecurity analyst with hands-on training in static malware analysis, phishing detection and packet analysis who is actively seeking a cybersecurity role. I am constantly learning and building my skills to defend assets and solve real-world security problems.

Education

B.Sc. in Computer Science | CGPA: 4.64/5.0 | Ahmadu Bello University

Expected 2026

Trainings and Certifications

SOC Analyst Path | Letsdefend

Completed

- Gained hands-on core fundamentals of SOC operations, Cyber Kill Chain, MITRE ATT&CK, phishing analysis, SIEM alert investigation, malware types.
- Built practical detection and response skills by analyzing threats, investigating alerts and applying frameworks to handle real-world security incidents including using Splunk for log ingestion, searches, reports, alerts and dashboards.
- Performed malware analysis and extracted Indicators of Compromise (IOCs) to support incident response.

Cybersecurity for Student | Letsdefend

Completed

- Built practical foundational SOC analyst skills through interactive labs covering malware analysis, phishing detection and packet analysis.

Junior Analyst Pathway | SBT

Completed

Fortinet Certified Fundamentals | FCF

Completed

Projects

Hash Cracker | <https://github.com/TheilJannah/Hash-Cracker> | Python

Aug 2025

- Developed a python program that brute forces different hash types to get their plain texts.

OSINT Investigation | Research/Reconnaissance

Apr 2025

- Applied username correlation, social media profiling and data leak analysis to accurately uncover the identity of an anonymous course mate without accessing private data.

Caesar Cipher | <https://github.com/TheilJannah/Caesar-Cipher/> | Java

Oct 2024

- Developed a custom encryption and decryption tool using the Caesar Cipher algorithm to securely convert plaintext into ciphertext and vice-versa.

Work and Virtual Experience

Computer Science Intern | ACETEL NOUN

July - Dec 2025

- Automated excel workflows with python.
- Configured and installed computers.

Cybersecurity Intern | Forage - AIG

Sep 2025

- Identified vulnerabilities, provided remediation guidance and developed a Python script to recover data during a ransomware incident.

Cybersecurity Intern | Forage - Deloitte ANZ

Aug 2025

- Analyzed web activity logs and user behaviour to detect suspicious and automated activity to supported clients during a security breach.

CTFs

Holmes CTF

Sep 2025

- Competed in a team of 5 members, solving real world security challenges across SOC, DFIR, Threat Intel and Malware Reversing. My team came 1001st out of over 7000 teams.
- Took ownership of **the card** independently solving 11 out of 12 flags using Splunk and TI platforms.
